

**Amendments to the Specification:**

Please replace paragraph 00011 (beginning on page 4, line 14, of the substitute specification with the words "In some embodiments..." and ending on page 4, line 15, of the substitute specification with the words "... high density polyethylene.") with the following amended paragraph.

In some embodiments of the invention, the first polymeric portion contains, in addition to the carbonyl-containing polymer, polyethylene, preferably high density polyethylene. In some embodiments of the invention, the VDF copolymer consists essentially of repeating units derived from vinylidene fluoride and 8-12% by weight, for example 9-11% by weight, based on weight of the copolymer, of repeating units derived from HFP.
